

BREAKING NEWS ALERT FROM 2BMONTHLY

1 February 2016

Italpollina SpA Announces a New Investment in the USA

Italpollina SpA, Verona, Italy just announced it has reached agreement to build a new state of the art manufacturing facility in Anderson, Indiana. The location will serve as North American headquarters for its wholly owned subsidiary Italpollina USA, Inc.

According to 2BMonthly information, the construction will start in March 2016 and the buildings, which will include a Research center for plant biostimulants, will be located near the new Purdue Polytechnic Anderson. The Purdue Polytechnic Center in Anderson is part of the world-famous Purdue University.

Italpollina Chief Executive Officer Luca Bonini says "the construction of this new plant is a very exciting step for our company since it confirms our commitment to the US market and shows the importance of biotechnologies in agriculture."

Italpollina plans to produce plant based biostimulants and specialty fertilizers at the new 70,000 square-foot location expected to open in the summer of 2017.

Italpollina USA began commercial activity in the US in December of 2013. Jon Leman, Commercial Director for Italpollina USA stated, "the new facility will enable us to better serve our US customers as we continue to bring innovative technologies to the market place." "We are pleased to begin this phase of our long term strategic plan to serve the North American market."

ITALPOLLINA founded in 1971 by Cav. Licinio Bonini, has grown to become one of the world leaders in the production of organic fertilizers, biostimulants of vegetal origin and beneficial microorganisms. Established on the principles of sustainable agriculture and environmental safety, the company offers a wide range of innovative solutions, available in more than 70 countries worldwide.
